

Projects

SmartLister www.SmartLister.website *Techs Used- Html, Css, React, Node, Mysql, Aws S3*

- Web app for property sellers who want to avoid real estate agents and directly market their property to potential buyers
- Developed and implemented responsive web-design with reusable components using React
- Designed a REST API using Node JS and Express with endpoints for users, properties, and favorites list
- Utilized JSON Web Token and local storage to store encrypted user information
- Used Amazon Web Services S3 buckets to store property images uploaded by property sellers
- Demo login - email => Isralh92@gmail.com password => 195419

E-Health www.Ehealth.work *Techs Used- Html, SCSS, React, Node, Mysql, Socket.io, Aws S3*

- Web app that connects patients and doctors through video chat
- Patients able to create, update, delete appointments and rate doctors with all information saved to Mysql database
- Utilized socket.io and simple peer wtc library to facilitate video communication between patients and doctors
- Developed scalable and reusable components using React
- Designed a REST API using Node JS and Express with endpoints for user, appointments, and video session Id
- Incorporated SCSS to write easier and faster styles using variables and mixins over traditional CSS
- Demo login - Customer- email => Isralh92@gmail.com password => 195419
- Demo login - Provider- email => JoeA@gmail.com password => 195419

Portfolio Site www.Isralhadero.com *Techs Used - Html, Css*

- Portfolio site used to show of my projects, github links to project source codes and contact information
- Used a mobile first approach to build the responsive portfolio site
